

COMBINED FINANCE AND REVENUE

ACCOUNTS

OF

UNION AND STATE GOVERNMENTS

IN

INDIA

FOR THE YEAR

2005 - 2006

Volume-I

FOREWORD

With the coming into force of the Comptroller and Auditor General of India (Duties, Powers and Conditions of Service) Act, 1971 it was no longer the statutory responsibility of the Comptroller and Auditor General of India to prepare the Combined Finance and Revenue Accounts. However, we have continued the practice under my directions as it emphasizes the federal character of Financial Administration in this country. I am sure that the data contained in this document would be of use to Union and State Governments and to researchers and students of public finance.

The Combined Finance and Revenue Accounts is a unique document that incorporates in one place comparable information relating to the accounts of the Union and all the States for a year, together with their balances and outstanding liabilities and other information relating to financial health of Union and States. This compilation is based mainly on the figures contained in the respective Finance Accounts of the Governments concerned.

I hope this compilation would aid in improving the transparency and completeness of Government accounts in India.

(Vijayendra N. Kaul)
Comptroller & Auditor General of India

Place : New Delhi

**COMBINED FINANCE AND REVENUE ACCOUNTS OF THE UNION AND STATE
GOVERNMENTS IN INDIA FOR THE YEAR 2005-06**

TABLE OF CONTENTS

Account No.	Particulars	Pages
Volume - I		
	Table of Contents	i
	Introductory	ii to vi
	Overview Material	1-32
1.	Summary of Receipts & Disbursements of the Union, Union Territory and State Governments for the year ended 31st March, 2006.	34-41
2.	Account showing by Major Heads the Revenue Receipts of the Union, Union Territory and State Governments for the year ended 31st March, 2006.	42-57
3.	Account showing by Major Heads the Expenditure met from Revenue of the Union, Union Territory and State Governments for the year ended 31st March, 2006.	58-85
4.	Account showing by Major Heads the Receipts and Expenditure (Capital Account) of the Union, Union Territory and State Governments for the year ended 31st March, 2006.	86-101
5.	Account showing by Major Heads the Receipts and Disbursements on account of Public Debt, Loans & Advances (Consolidated Fund) and Contingency Fund of the Union, Union Territory and State Governments for the year ended 31st March, 2006.	102-133
6.	Account showing by Major Heads the Receipts and Disbursements on account of Public Account in respect of Union and State Governments for the year ended 31st March, 2006.	134-157

Combined Finance and Revenue Accounts of the Union and State Governments in India for the year 2005-2006

Introductory

1.1 Combined Finance and Revenue (CFR) Accounts were being prepared in the past under the provisions of para 12 of Audit and Accounts Order 1936 as adapted by the Government of India (Provisional Constitution) Order 1947 read with Article 149 of the Constitution of India. With the coming into force of the Comptroller and Auditor General's (DPC) Act, 1971, the Government of India (Audit and Accounts) order 1936 ceases to be in force except as anything done or any action taken thereunder. It is, therefore, no longer the statutory responsibility of the Comptroller and Auditor General of India to prepare the Combined Finance and Revenue Accounts. The compilation, however, continues to be prepared under the directions of the Comptroller and Auditor General of India as it is considered as useful compilation and presents the accounts of all the Governments in India on a common and comparable basis. The compilation is prepared mainly on the basis of the figures contained in the respective Finance Accounts of the Governments concerned.

1.2 Pursuant to the decisions taken on the recommendations of a Committee constituted in December 1997 to examine various Accounts in this compilation from the point of view of their utility and format this compilation has been prepared in 3 volumes: the first volume containing major-headwise summary of receipts and disbursements of various Governments from the Consolidated Fund, the Contingency Fund and the Public Account, the second volume containing Subsidiary Accounts relating to Economic Services and the third volume containing Subsidiary Accounts relating to the General, the Social Services etc. The Subsidiary Accounts give details generally by minor heads of the figures shown in the General Accounts in volume.I. Schemewise details are available in the concerned Finance Accounts of the respective Governments. Detailed Accounts relating to Public Account have not been given, the major head-wise details being available in General Accounts, Volume-I. An Overview on Government accounts has also been added in Volume-I which provides information on Assets and Liabilities of the government, summary operation of the current year Receipts, Disbursements, Debt, Surplus and Deficits of Governments and allocative priorities of its expenditure.

2. Main Division of Accounts :-

The accounts of Government are kept in three parts :-

Part-I Consolidated Fund

Part-II Contingency Fund

Part-III Public Account

2.1 In Part-I, there are two main divisions, viz.-

1. **Revenue** - consisting of sections for 'Receipt Heads (Revenue Account)', and 'Expenditure Heads (Revenue Account);
2. **Capital, Public Debt, Loans, etc.** - consisting of sections for 'Receipt Heads (Capital Account)' 'Expenditure Heads (Capital Account)' and 'Public Debt, Loans and Advances, etc;

The Revenue division deals with the proceeds of taxation and other receipts classed as revenue and the expenditure met therefrom, the net result of which represents the revenue surplus or deficit for the year.

In Capital division, the section 'Receipts Heads (Capital Account)' deals with receipts of capital nature which can not be applied as a set off to capital expenditure.

The section 'Expenditure Heads (Capital Account)', deals with expenditure met usually from borrowed funds with the object either of increasing concrete assets of material and permanent character or of reducing recurring liabilities. It also includes receipts of capital nature intended to be applied as a set off against expenditure.

The section 'Public Debt, Loans and Advance, etc.', comprises loans raised and their repayments by Government such as 'Internal Debt' and 'Loans and Advances', made (and their recoveries) by Government. This section also includes certain special types of heads of transactions relating to 'Appropriation to the Contingency Fund' and 'Inter-State Settlement'.

2.2 In Part II of the Accounts are recorded the accounts of transactions connected with Contingency Fund established under Article 267 of the Constitution of India.

2.3 In Part III of the accounts, the transactions relating to 'Debt' (other than those included in Part I) 'Deposit', 'Advances', 'Remittances' and 'Suspense' are recorded. The transactions under 'Debt', 'Deposit', and 'Advances' in this part are those in respect of which Government incurs a liability to repay the moneys received or has a claim to recover the amounts

paid, together with the repayments of the former ('Debt' and 'Deposit') and the recoveries of the latter ('Advances'). The transactions relating to 'Remittances' and 'Suspense' in this part embrace all heads which are merely adjusting heads under which appear such transactions as remittances of cash between treasuries and currency chests, account between different accounting circles, etc. The initial debits or credits to these heads will be cleared eventually by corresponding receipts or payments either within the same circle of account or in another account circle.

3. Sectors and heads of Accounts :-

Within each of the section in Part I mentioned above, the transactions are grouped into sectors such as 'Tax Revenue', 'Non-Tax Revenue' and Grants-in-aid and Contributions, for the receipt heads (Revenue Account) and 'General Services', 'Social Services', 'Economic Services' and 'Grant-in-aid and contributions' for expenditure heads. Specific functions or services such as Education, Medical, Family Welfare, Housing, etc. in respect of Social Services are grouped in the sectors for expenditure heads. In part III also the transactions are grouped into sectors, such as 'Small Savings', Provident Funds' and 'Reserve Funds' etc. The sectors are sub-divided into major heads of account. In some cases the sectors are in addition, sub-divided into sub-sectors before their division into major heads of account.

3.2 The major heads are divided into minor heads, each of which has number of subordinate heads, generally known as sub heads. The sub-heads are further divided into detailed heads. Under each of these heads, the expenditure is shown distributed between charged and voted. Sometimes major heads are also divided into sub-major heads before their further division into minor heads. The Sectors and Sub Sectors, the Major Heads, Sub Major Heads, Minor Heads, Sub Heads and Object Heads constitute a six tier arrangement of the classification structure of Government Accounts. The major, minor and sub-heads prescribed for the classification of expenditure in the general accounts are not necessarily identical with the Grants, sub heads and other units of allotments, which are adopted by the Ministry of Finance/Finance Department for Demands for Grants presented to the Parliament/Legislatures, but in a general a certain degree of correlation is maintained between the Demand for Grants and the Finance Accounts.

The major heads of accounts, falling within the sectors for expenditure heads, generally correspond to functions of Government, while the minor heads, subordinate to them, identify the programmes undertaken to achieve the objectives of the function represented by the major head. The sub-head represents scheme, the detailed head, the sub-scheme and object head, the object level of classification.

3.3 Coding Pattern

Major Heads

A four digit code has been allotted to the major heads, the first digit indicating whether the major head is a Receipt head or Revenue Expenditure head or Capital Expenditure head or Loan head.

The first digit of Code for Revenue Receipt heads is either 0 or 1. Adding 2 to the first digit Code of the Revenue Receipt head will give the number allotted to corresponding Revenue Expenditure head; adding another 2, the Capital Expenditure head; and adding another 2, the Loan head of Account. For example, for a Crop Husbandry head, code 0401 represents the Receipt head; 2401, the Revenue expenditure head, 4401, the Capital Outlay head and 6401, the Loan head.

Such a pattern is, however, not relevant for those departments which are not operating Capital or Loan head of accounts e.g. Department of Supply. In a few cases, however, where Receipts and Expenditure are not heavy, certain major heads have been combined under a single number, the major heads themselves forming sub-major heads under that number.

Sub-Major Heads

A two digit code has been allotted, the code starting from '01' under each major head. Where no sub-major head exists, it is allotted a code '00'. Nomenclature 'General' has been allotted Code '80' so that even after further sub-major heads are introduced, the Code for 'General' will continue to remain the last one.

Minor Heads

Minor Heads have been allotted a three digit code, the codes starting from '001' under each sub-major/ major head (where there is no sub-major head) Codes from '001' and few codes '750' to '900' have been reserved for certain standard minor heads. The coding pattern for minor heads has been designed in such a way that in respect of certain minor heads having a common nomenclature under various major/sub-major heads, as far as possible, the same three digit code is adopted.

Under this scheme of codification, receipt major heads (revenue account) assigned the block numbers from '0020' to '1606' expenditure major heads (revenue account) from '2011 to '3606' expenditure major heads (capital account) from '4046' to '5475', major heads under Public Debt from '6001' to '6004' and those under 'Loans and Advances'; 'Inter-State Settlement' and 'Transfer to Contingency Fund' from '6075' to '7999'. The Code number "4000" has been assigned for Capital Receipt Major Head. The only major head 'Contingency Fund' in part II, 'Contingency

Fund' has been assigned the code number '8000'. The major heads in the Public Accounts are assigned the code numbers from '8001' to '8999'.

4.1 The transactions included in the compilation represent mainly the actual receipts and disbursements during the financial year 1 April 2005 to 31st March 2006 as distinguished from amounts due to or from Government during the same period. The cash basis system is however, not entirely suitable for recording the transactions and presenting the true state of affairs of Government commercial undertakings run on commercial principles. The detailed accounts of this class of undertakings are therefore, maintained outside the regular accounts in proper commercial form and are not included in this compilation.

4.2 The figures of actuals shown in these accounts are net after taking into account the recoveries although the Demands presented to the Parliament/Legislature and the Appropriation Accounts are for gross expenditure and exclude the receipt and recoveries which are otherwise permissible to set off in reduction of expenditure.

5 In this compilation a specified pattern has been adopted according to which an account No. by itself say No 25 relates to receipts under that head. If suffixed by 'A' (No.25A) it relates to expenditure under that head, if suffixed by 'B' relates to capital outlay and lastly if by 'C' to the loans.

6. Cash Balance

There are separate Cash Balances of the Union and each of the State Governments which are either held in a Government Treasury or kept with the Reserve Bank of India.

As it is a difficult and complicated process to split up the balances of the 'Consolidated Fund' 'Contingency Fund' and 'Public Account', one single balance is shown in these accounts for all the three parts.

In this compilation, the figures in the Account Statement of summary transactions, overview, suspense balances and Capital and Other Expenditure have been exhibited in crores of rupees and in the Other Subsidiary statements in thousands of rupees.

7. The Subsidiary Accounts relating to Railway, P&T and Defence have not been included. The major headwise information relating to these accounts is available in the General Accounts, volume I.

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is arranged in several paragraphs and is difficult to decipher due to its low contrast and blurriness.

OVERVIEW OF COMBINED FINANCE AND REVENUE ACCOUNTS (UNION AND THE STATES)

1.0 Introduction

1.1 Accounting as a system is defined as "a set of assemblage of things connected, associated or interdependent, so as to form a complex unity; a whole composed of parts in orderly arrangement according to some scheme or plan¹". Government accounting over the years has developed from a simple housekeeping to a policy instrument sub-serving the needs of economic management. Accounting is charged with identification, selection and analysis, measurement, estimation, processing and communication of information on receipts, expenditures, assets, liabilities, costs and benefits and all other aspects that legitimately form part of the fiscal management of a state². Accounting systems essentially follow the parameters of budget and provides the required information at various stages of budget formulation and implementation. As such, the coverage, the basis and the classification of budgets and accounts are closely linked.

1.2 The accounts of the Union and the States in India are the financial statements providing basic level of information as indicated above to facilitate an assessment of the overall operations of these entities. The presentation of accounts is usually driven by user needs, but users and their purposes in seeking financial information may differ from time, from place to place and according to context. Even when these needs are known or explicitly indicated, it may at times be difficult to arrange information customized according to these needs, as these may vary from too much of selected details to a desired aggregation. Audit agencies in Canada and USA conducted a survey in 1986 to identify the user needs³. This survey divided users into six broad categories- legislators and citizens; media and special interest groups; government planners and managers; economists; corporate users; and lenders and securities dealers. Notwithstanding the diverse nature of the users, there appeared a considerable commonality of interests and convergence on what was needed to be provided by the finance accounts. Users desired an annual report; recognition of physical assets; actuarial liabilities on pensions and ongoing programmes; tax expenditure; budgetary outcomes- comparison of actual to estimates; measures of deficit; performance indicators and disaggregated information preferably according to programme and region along with timeliness of their presentations.

1.3 While there has been no such survey and explicit statement of user needs in India, the expectations⁴ of the stakeholders from the financial statements of the government may be the following:

- Assess the sources and types of revenues:
- Assess the allocation of and use of resources:

¹ Shorter Oxford English Dictionary

² Accounting is also defined as the process of identifying, measuring, recording and communicating economic transactions.

³ United States, General Accounting Office and Canada, Office of the Auditor General (1986)

⁴ Adapted from the presentation made by ICRA

- Assess the extent to which revenues were sufficient to cover costs:
- Assess the government's long term ability to meet financial obligations:
- Assess the government's overall financial condition:
- Evaluate government spending options and priorities:
- Assess whether resources were used in accordance with legally mandated budgets and other legislative and related authorities; and
- Assess the government's stewardship over the custody and maintenance of resources

1.4 Much of the information that the users need comes from the basic budgetary accounts maintained at different layers of government and associated economic and statistical data collected and compiled at central or at convenient locations or at organization at national or at earmarked geographic levels. However, the first step in delineating the analytical framework of financial reporting is to determine the basic level of information to be collected and then aggregated so as to assess the overall performance of governance at different layers which would also meet the user's information needs and expectations. There is always a trade off between giving details (as that may make the compiled accounts bulky and unmanageable) and possible simplification (as reducing the number of account codes could result in potential loss of detail in accounting information) and that prevents full customization. Broad architecture⁵ of government's financial information could be summarized as under.

Architecture of Governments Financial Information Flow							
Citizens							
Legislatures							
Donors	International Agencies		Domestic Investors	Media		Special Interest Groups	
Executive Departments			Planning, Allocating and Raising of Resources			Audit	
Receipts	Disbursements	Surplus/Deficit	Fresh Liabilities	Assets	Debt Stock	Performance Indicators	Economic and Social Well being
Flow				Stock		Use of resources	Surrogate Performance Measure

1.5 The Union and State government accounts presented as "financial statements" also summarizes the financial transactions of these entities using a defined coding⁶ pattern. The major heads of accounts, falling within the sectors for expenditure heads generally correspond to functions of government, while the minor heads, subordinate to them, identify the programmes undertaken to

⁵ A Prem Chand : Effective Government Accounting. Page 143

⁶ Transactions of the government at both the layers of the Union and States are aggregated adopting a uniform coding pattern which follows: major heads-sub major heads-minor heads. Major heads are in four digits, where first digit indicates whether it is Receipt head or Revenue Expenditure head or Capital Expenditure head or a Loan head. There are also a separate heads for transactions in Public Account. A two digit sub major head and three digit minor head is added to the major heads for required disaggregating of transactions. Though transactions further have a separate Object Code, Statements in the Finance Accounts do not get to that level of disaggregation.

achieve the objective of the function represented by the major head. The sub-head represents scheme, the detailed head, the sub-scheme and object head, the object level of classification.

1.6 Accounts are separately rendered for each government, but since these have a uniform pattern, it is possible to generate/construct combined accounts. Combined Finance and Revenue (CFR) Accounts were being prepared in the past under the provisions of para 12 of Audit and Accounts Order 1936 as adapted by the Government of India (Provisional Constitution Order 1947 read with Article 149 of the Constitution of India. With the coming into force of the Comptroller and Auditor General of India (Duties, Powers and Conditions of Service) Act, 1971 it was no longer the statutory responsibility of Comptroller and Auditor General of India to prepare the Combined Finance and Revenue Accounts. However, since it emphasizes the federal character of Financial Administration in the country the practice has been continued.

1.7 Broad divisions of government's finance accounts-Consolidated Fund, Contingency Fund and Public Accounts are indicated in the box below.

Box I: Division of Government Finance Accounts

The three funds which government operates form the main divisions of accounts:

• **Consolidated Fund**

The revenues received by the Government, all loans raised nationally and from other countries, multilateral agencies and others by the Government by issue of treasury bills, ways and means advances, market borrowings, special securities, etc. recovery of loans, form the Consolidated Fund.

• **Public Account**

All other moneys received by or on behalf of the Government forms the Public Account. Items included in such funds are small savings/provident Fund, Deposits of local bodies, Reserve Funds, Suspense, Remittances and Cash Balance. These items are not subjected to the vote of the legislature.

• **Contingency Fund**

The Contingency Fund is in the nature of an imprest into which sums as determined by law shall be paid from time to time. Advances are made out of the fund for meeting unforeseen expenditure pending authorization of such expenditure by the legislature.

1.8 The Combined Finance and Revenue Accounts (CFRA) released in three volumes may also appear to be quite voluminous for most of the stakeholders or information seekers. An "overview" of CFRA has accordingly been conceived providing basic details. The overview of the accounts look at the information needs of various stakeholders and attempts to provide a birds eye view of operations of the government in terms of some defined parameters. It has four sections dealing with: Assets and Liabilities or the cumulative assessment of the operations of the government: Summary of operation of the current year and operating surplus and deficits; Revenue receipts of the government and the Allocative priorities of its expenditure. These broadly conform to the user needs.

2.0 Balance Sheet of the Core Government*

2.1 Though there is no concept of a Balance Sheet as in the case of a commercial enterprise for the Government, it is none-the-less possible to construct one from the information available in the accounts in the form of its assets and liabilities or in terms of a statement of balances of resources. Liabilities of the Government include its internal debt, external debt, small savings and provident fund⁷, reserve funds⁸ and other deposits. The assets⁹ of the Government include its capital expenditure on creation of economic and social infrastructure and its loans and advances.

Table 1 Assets and Liabilities and the Statement of Balances (position as on 31st March 2006) (Rs. in crore)

ASSETS	Union	States	Combined	LIABILITIES	Union	States	Combined
Capital Expenditure	(Cumulative figures)			(Cumulative figures)			
General Services	239862	18166	258028	Internal Debt	1389758	666102	2055860
Social Services	10559	90896	101455	External Debt	94243	0	94243
Economic Services	292626	426067	718693	Loans from CG	0	184066	184066
Total	543047	535129	1078176	Small Savings	275380	160955	436335
Loans and Advances				Reserve Fund	22843	63120	85963
General Services	5566	32746	38312	Others ¹⁰	83161	89461	172622
Social Services	12022	20444	32466	Total Liabilities	1865385	1163704	3029089
				(Available Funds)			
Economic Services	55423	108149	163572				
State Governments ¹¹	158024	--	158024				
Total	231035	161339	392374	Other Receipts	0	4618	4618
Cash Balances	65488	-2769	62719	Cumulative ¹² Resource Gap (Revenue Deficit)	1006741	416995	1423736
Investments	19074	48392	67466				
Total Assets	858644	742091	1600735	Resource Use	858644	742091	1600735

⁷ Public Account includes small savings, provident fund and deposits and are maintained by Government more in its capacity as a banker.

⁸ Reserve Funds are created by charging the amount in revenue account of Consolidated Fund. These are purpose specific and despite being aberrations in cash based accounting, visualizes earmarked resource flows. Further, these would largely be self-liquidating. This concept was, however, introduced to earmark resources on an annual basis to take care of lumpy expenditure or to allocate these to specific purposes.

⁹ Though the capital expenditure, which includes expenditure on machinery, buildings and others, is of different vintages, their aggregation is straight and without any discounting. While this may not depict the actual productive value or replacement value of these items, it is the best possible figures of assets that is available. Further, since the expenditure is incurred from the revenue and capital receipts, there is a direct relationship between the liabilities and assets defined in this fashion. No such aggregation problem is, however, envisaged in loans and advances.

¹⁰ Other sources include interest and non-interest bearing deposits, net credit balances of suspense, remittances and advances.

¹¹ The entries of loans and advances to the States on assets and loans from Union Government on liabilities side should generally be same. Differences may need to be reconciled.

¹² It is the residual.

* Core Government indicates Government Departments and Departmental Undertakings both of the Union and the States (but excluding Public Sector Undertakings/Autonomous Bodies that maintain independent accounts).

2.2 Overall resources of the core Government (Union and States) at the end of March 2006 were Rs. 30291 billion. As against this, the total assets valued at the historic rates were Rs. 16007 billion. The Central Statistical Organisation¹³ in their National Accounts Statistics had estimated the Net Capital Stock of the administrative departments and the departmental undertakings, which generally corresponds to the core Government during 2005-06 at Rs.17994* billion. Total assets as defined above (cumulative capital expenditure and outstanding advances) worked out to 89 per cent of the NAS net capital stock (this would get reduced to around 80.2 per cent with the adjustment of outstanding advances of the Union Government to the States). Ratio of the combined assets to the liabilities of the Union and States was 52.85 percent (46.03 percent for the Union Government and 63.77 percent for the States). The assets of the Union Government, however, also included the loans and advances made by it to the States. This was in the nature of a contra entry as these assets of the Union Government were the liability of the States. Removal of this entry, however, would not lead to any reduction in the shortfall in assets relative to liabilities, as these would set off each other, but it may result in a marginal decline in the overall ratio of assets to liabilities¹⁴. A lower ratio of assets to liabilities is indicative of the extent of erosion of resources of these entities and inadequacy of their assets back up. As on 31st March 2006 nearly 47 percent of the liabilities had ceased to have assets back up. This assessment is, however, valid independent of the way the assets and liabilities are measured and aggregated.

2.3 There have been significant inter-State variations in the parameters relating to stock of assets and liabilities. Apart from the variations in the absolute values of assets and liabilities, which may arise because of the differences in the size of the entities, variations have been observed in various scale neutral parameters as well. Per capita assets¹⁵, ratio of assets to liabilities and ratio of accumulated stocks of assets to the current revenue receipts of the States have been taken as the three scale neutral parameters for inter-state comparisons and along with total assets are indicated in Annex I. The following broad conclusions emerge from this comparison:

¹³ National Accounts Statistics released by Central statistical Organisation also publishes Net Capital Stock of the Public Sector. The Net Capital Stock of Administrative Departments and Departmental Undertakings would broadly correspond to the core Government. NAS follows the perpetual inventory method and adopts depreciation based on defined life of various assets.

¹⁴ These liabilities exclude Governments' pension obligations, unreckoned liabilities and contingent liabilities. Pension expenditure is showed based on what is incurred annually. But these could be considered as annuity payments. Preliminary estimates conducted in 2001 using World Bank PROST actuarial model suggested that the present value of central and States pension liabilities could amount to 25 per cent of GDP. In many States, some of the liabilities or payment obligations may not be reckoned fully. Outstanding payments of Dearness allowances arrears, payments to suppliers, etc., are a few of such obligations. These liabilities are not included in the fiscal liabilities. Guarantees given by the Union and States, which are in the nature of contingent liabilities, are also excluded.

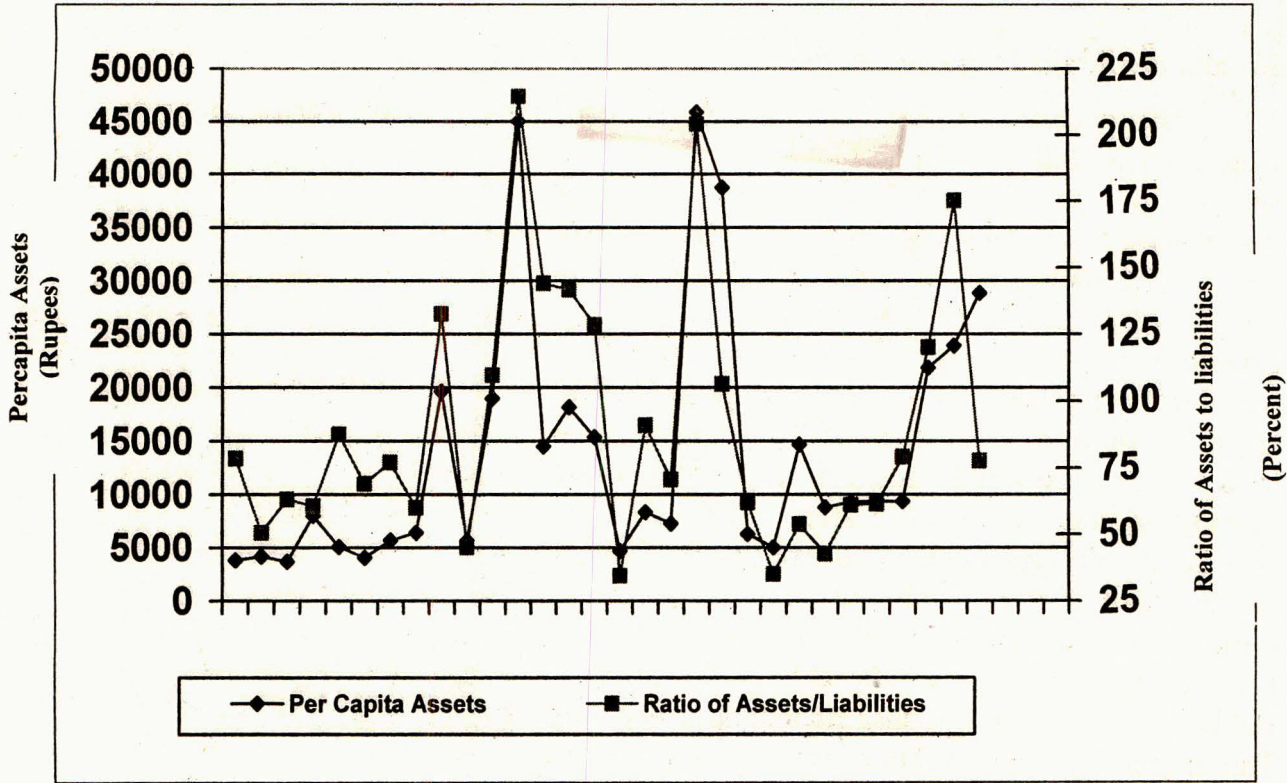

¹⁵ Population figures used for generating the per capita assets series are of mid year 2005-06.

* The requisite figures for net capital stocks and GSDP for some of the States are not available for the year 2005-06. GSDP of the States have been estimated using the methodology determined by nature and behavior of the trends in the previous years. Net capital stock figures have been estimated using the average rate of growth during the last five years.

- a. Ten States (most of these were, however, special category States) ¹⁶ Puducherry, Arunachal Pradesh, Delhi, Jammu & Kashmir, Manipur, Meghalaya, Sikkim, Mizoram, Nagaland and Tripura had assets exceeding their liabilities. The ratio of assets to liabilities was less than 60 per cent for Kerala, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Himachal Pradesh and Uttarakhand. The States which had a ratio of their assets to liabilities exceeding 75 per cent were Bihar, Haryana, Goa, Madhya Pradesh, Karnataka, and Assam .
- b. Per capita overall assets varied from Rs.3702 for Jharkhand to Rs.45867 for Sikkim. The other States which had per capita assets exceeding Rs.10000 included Delhi, Goa, Puducherry, Arunachal Pradesh, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Nagaland, Mizoram and Tripura. The index of per capita assets varied from a low of 55.22 for Jharkhand to 684.17 for Sikkim.
- c. The ratio of their assets (stock as on 31st March 2006) to revenue receipts (current year 2005-06) was, however, more range bound. While it was less than 1.0 for Uttarakhand, it exceeded 3.0 for Delhi. For other States, this varied from 1.0 to 3.0.
- d. The level of assets did not seem to be one-to-one related to the level of per capita income of the States. Depicting per capita income of the States on horizontal scale in an ascending order and the ratio of assets to liabilities and per capita assets for the States on two vertical axis in Graph- I below indicates a weak correlation between base level of prosperity (proxied by per capita income) and assets formation by the States.

¹⁶ Special Category States have special dispensation with regard to their block plan assistance. Against a ratio of 30:70 between grants and loans for other States, these States have a ratio of 90:10. This increases the quantum of grants in aid to these States relative to others.

Graph-I
Per Capita Assets and Assets to Liabilities Ratio of States

3. Summary of Annual Accounts

3.1 While the balance sheet or summary of balances is the accumulated position as on 31st March 2006 and represents the stock of both assets and liabilities, it does not indicate the current performance of the Government. Parameters like the States' ability to raise resources- both taxes and user charges from its various services, expenditure and cost of delivery of service, allocative priorities of its disbursement, revenue and fiscal deficit (or fiscal imbalances) and net annual increase in its liabilities, etc. can not be gauged from the summary. Annual financial statements are the appropriate instruments for this purpose.

3.2 The overall revenue receipts¹⁷ of the core Government during 2005-06 were Rs.8736 billion. These Governments also raised Rs.227 billion by way of recovery of past loans and miscellaneous capital receipts¹⁸ (largely on account of disinvestments). The total non-debt receipts amounted to Rs.8963 billion and these were distributed between the Union and the States in the ratio of 50:50. Total expenditure of the Government comprising revenue expenditure, capital expenditure and loans & advances amounted to Rs.11531 billion and its distribution between Union and States was in the ratio of 53:47. The revenue expenditure for both the tiers of Government exceeded their revenue receipts and total expenditure was higher than their total non-debt receipts. These imbalances manifested themselves in existence of revenue and fiscal deficit for both these tiers of the Government. The Consolidated Fund was in deficit for the Union Government and in surplus for the States. Creation of National Small Savings Fund¹⁹ had contributed to this surplus. This was an accounting adjustment as it had transferred the accumulated liabilities of small savings (opening balances) in Public Account to the Consolidated Fund by way of issue of special securities. The impact of this creation was both immediate and recurrent. Since the outstanding balances were converted into dated securities, it led to the creation of a surplus in Consolidated Fund for the first time while keeping the accumulated stock of debt unchanged. However, as a recurring phenomenon this arrangement reduced the fiscal deficit of the Union Government (relative to accounting arrangement in the earlier years) and its incremental liabilities to the extent the net accruals of the small savings transferred to the States by way of loans and advances prior to the constitution of NSSF. In the new dispensation the transfer from the NSSF was against the issue of dated securities by the Union and the States. Further, on account of acceptance of TFC recommendation regarding disintermediation of Central Government in borrowings by State Governments to finance their State Plans, the States were to raise the loan component of central plan assistance directly from the market without budgetary intermediation of the Central Government.

¹⁷ Revenue Receipts are gross and unadjusted for the transfers from the higher tier of the Government, except for the transfer of the taxes collected by the Union Government as mandated by Finance Commission. Expenditure has also been taken on gross basis.

¹⁸ Miscellaneous capital receipts or recovery of outstanding loans essentially involves a reduction in assets, financial or physical.

¹⁹ Prior to the constitution of NSSF, the net accruals of the small savings were transferred to the State by way of a long term loan from the Union. This inflated the expenditure of the Union Government and its fiscal deficit. With the creation of NSSF, Union Government issued dated securities equal to the amount of outstanding balances of small savings. There was, therefore, a decline in public account surpluses and increase in internal debt of the Union Government.

This mechanism has been put in place from the year 2005-06 reducing the liabilities of the Union to the extent of the loan component of central plan assistance, which in turn provided the cushion for reducing fiscal deficit of the Union Government.

Table 2: Summary of the Receipts, Disbursements, Deficit and Debt in 2005-06 (Rs. in crore)

Receipts	Derived Parameters		Disbursements				
	Union	States	Union	States	Union	States

Incremental Liabilities ²²	(Supply Side)		175957	123599	Surplus of (Debt+Small Savings+RF+Deposits)		
Incremental Liabilities	(Demand Side)		175957	123599	FD+Increase in Cash+Net Disbursement (Advances+suspense+Remittances)		

3.3 For both the Union and the States, revenue expenditure accounted for around 85.5 per cent of total expenditure (88.7 per cent for the Union Government and 81.9 per cent for the States). Capital expenditure and loans and advances accounted for the balance. Revenue expenditure for the Union Government also included grants in aid to States, which formed part of their revenue receipts. Similarly, a significant part

²⁰ Consolidated Fund Receipts also included excise duty receipts that were transferred to States. However, the revenue receipts and revenue expenditure indicated above is net of such transfers.
²¹ Includes Rs. 7368 crore representing excess of receipts over expenditure of NCT Delhi adopted here for balancing effect.

²² Normally fiscal deficit and incremental liabilities should be same. These have, however, differed because of the impact of suspense, remittances and advances. Increase in disbursements in these heads would increase the need for additional resources, the same may not get fully reflected in demand, which fiscal deficit would suggest.

of loans and advances of the Union Government were disbursed to the States. Actual expenditure from these capital receipts of the States occurred at their level. With these two adjustments, total combined expenditure of the Union and the States was Rs.10710 billions, or around 30.02 per cent of GDP²³.

3.4 The adjustment in revenue receipts (as the grants in aid of the States were part of the revenue expenditure of the Union) and revenue expenditure, however, would leave the combined revenue deficit of the Union and States unaffected. There would be an increase in revenue deficit of the States and an equal decline in case of the Union Government. Combined revenue deficit in 2005-06 was Rs.1123 billions (Rs.332 billion for the Union and Rs.791 billion for the States) and it was 3.15 percent of GDP (0.93 percent for the Union and 2.22 percent for the States)²⁴. Combined fiscal deficit would, however get reduced to the extent of loans and advances disbursed by the Union to States. Adjusted combined fiscal deficit was 7.04 percent of the GDP. Unadjusted Combined Revenue deficit was 43.72 percent of fiscal deficit. It was 66.5 per cent for Union and 2.80 per cent for States. This was the extent of use of incremental liabilities for the purposes of current expenditure by these entities and shortfall in their assets back up for fresh liabilities.

3.5 Inter-State variations in fiscal imbalances were significant. Annex 2 provides the State wise details of revenue and fiscal deficit of the States, ratio of these deficits to their GSDP, incremental debt and its ratio to their revenue receipts and the ratio of revenue deficit to fiscal deficit. Broad conclusions that emerge from the comparative analysis are summarized below:

- a. Nineteen States (Bihar, Chhattisgarh, Delhi, Haryana, Orissa, Tamil Nadu, Karnataka, Madhya Pradesh, Arunachal Pradesh, Puducherry, Himachal Pradesh, Nagaland, Sikkim, Mizoram, Jammu & Kashmir, Assam, Manipur, Meghalaya and Tripura) had a revenue surplus. For the other States, the ratio of revenue deficit to GSDP varied from a high of 3.45 percent for West Bengal to a low of 0.03 percent for Andhra Pradesh. Goa, Gujarat, Jharkhand, Rajasthan, Uttarakhand and Uttar Pradesh were the States where this ratio was less than 1.0 percent. The other States which had the ratio of revenue deficit to GSDP in excess of 1 percent were Maharashtra, Punjab, and Kerala.
- b. There were two States (NCT Delhi & Assam) which had a fiscal surplus. The ratio of fiscal deficit to GSDP varied from a high of 12.87 percent for Mizoram to a low of 0.31 percent for Haryana. The ratio of fiscal deficit to GSDP exceeded 5 percent in respect of Goa, Bihar, Jharkhand, Arunachal Pradesh, Jammu & Kashmir, Manipur, Mizoram, Sikkim and Uttarakhand.
- c. Revenue deficit as a percentage revenue receipts averaged 0.58 percent for the States. The ratio, however, exceeded 20 percent for Kerala and West Bengal. The ratio of revenue deficit to revenue receipts was 31 percent for West Bengal.
- d. The ratio of revenue deficit to fiscal deficit, which is also an indicator of the proportion of incremental borrowing used for the purpose of current consumption, averaged 2.80 percent. It exceeded 70 percent for Kerala and West Bengal.

²³ The GDP figures (Rs. 3567177 crore) used are as released by CSO and are at market prices. However, for inter state comparison figures used are of Gross State Domestic Product (GSDP) of each State as released by their respective Directorates of Economic and Statistics. The State wise GSDP figures are at factor cost and aggregated State figures are significantly lower (around 24.7 percent) than National GDP (market price). Even the aggregate of State wise GSDP at factor cost is only 83.7 percent of GDP at factor cost released by CSO.

²⁴ The ratio of revenue deficit (unadjusted) to GDP for the Union would be 3.08 percent and for States 0.07 percent.

e. The ratio of incremental liabilities to revenue receipts averaged 27.92 percent and exceeded 40 percent mark for Gujarat, NCT Delhi, Jharkhand and Maharashtra.

f. Revenue deficit relative to GSDP or the ratio of revenue deficit to fiscal deficit was observed to be generally unrelated to the level of per capita income as is indicated by the graph which has these parameters with States arranged in ascending order on the horizontal scale.

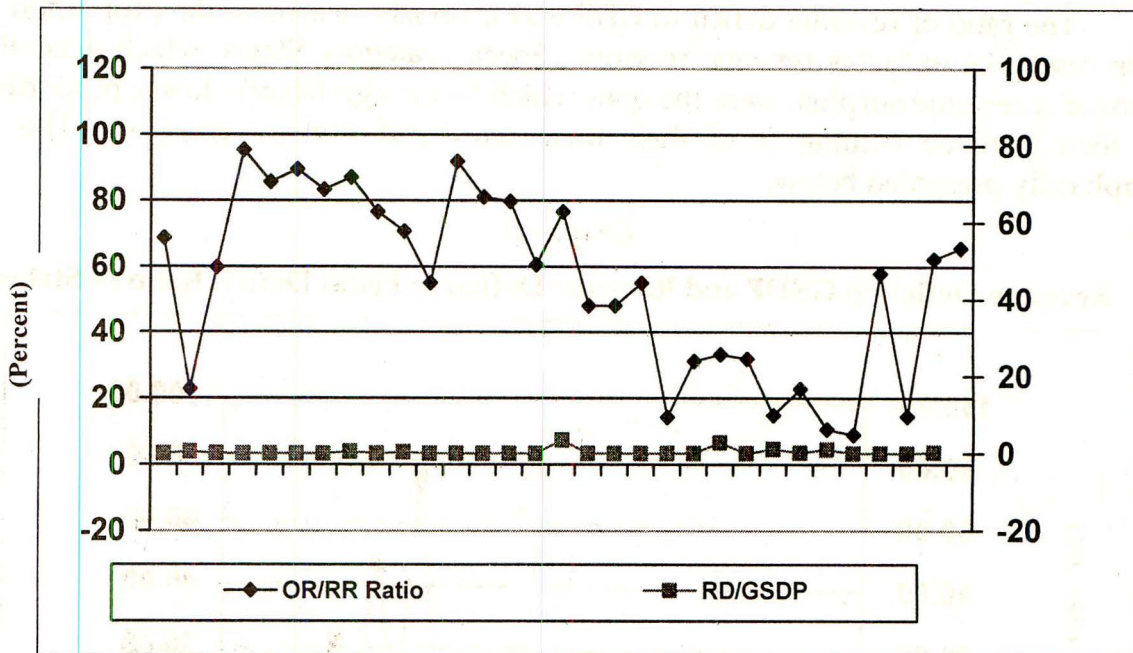

g. The ratio of revenue deficit to GDP was inversely related to the proportion of own resources in States revenue receipts. Special category States, which generally enjoyed a revenue surplus, were the ones which had a significantly lower proportion of their revenue coming from their own taxes and non-tax receipts. This is graphically presented below:

Graph- II

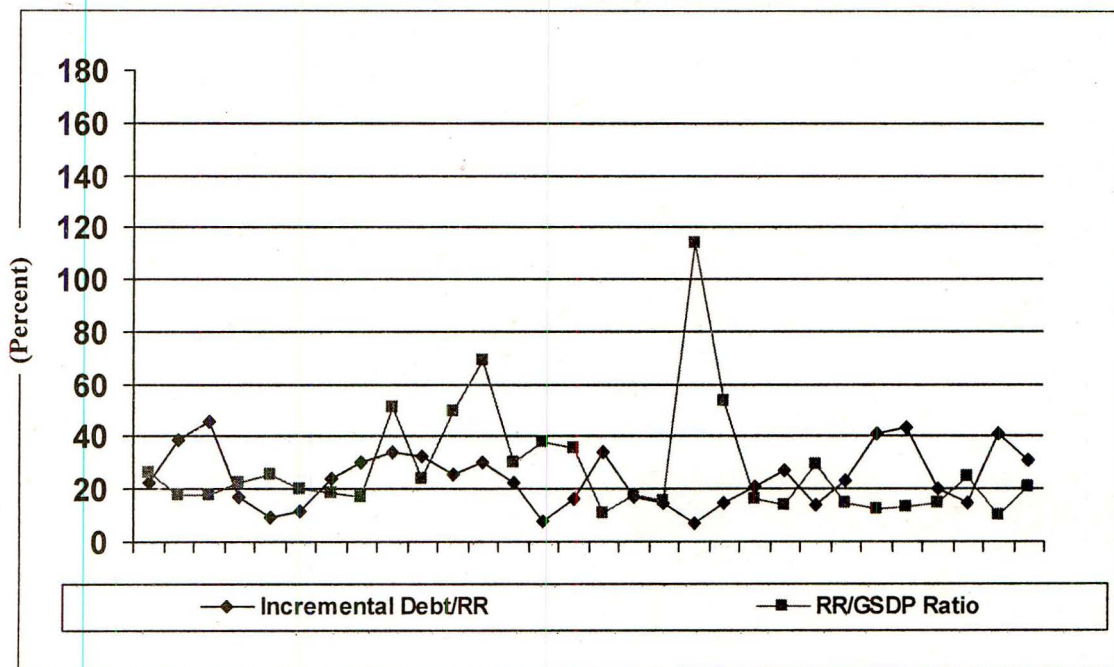

Revenue Deficit to GSDP and Revenue Deficit to Fiscal Deficit Ratio of States

Graph-III
Own Revenue resources to Revenue Receipts and Revenue Deficit to GSDP
Ratio of States

Graph-IV
Incremental Debt to Revenue Receipts and Revenue Receipts to GSDP
Ratio of States

4. Revenue Receipts

4.1 Revenue receipts of a Government are composed of the following four components:

- Receipts from the entities' own taxes.
- Receipts from entities' sovereign functions, financial intermediation and user charges for economic and social services provided.
- Devolution of taxes collected by the Union and transferred to the States in terms of the award by the Finance commission; and
- Grants-in-aid.

4.2 The revenue of the Union from the taxes and duties levied and collected by it is indicated in its revenue receipts as net of the share of States transferred to them in terms of the award of the Finance Commission. The States' share in Union pool of taxes and duties form the part of the revenue receipts of the respective State/UT Government. Similarly, the grants-in-aid transferred by the Union to the States are in the nature of revenue expenditure of the Union and form part of revenue receipts of the States. Revenue receipts of the Union and the States adjusted for these two factors amounted to Rs.7971 billion. Around 74 per cent of the adjusted revenue came by way of taxes and the rest from non-tax receipts. This proportion, however, significantly varied for the Union and the States and also within the States.

Table 3: Revenue Receipts and its composition (Rs. in crore)

	Union	States	Combined
Revenue Receipts	430940	442702	873642
Tax Revenue	366151	221486	587637
Non-Tax Revenue	156151	49693	205844
Tax Proceeds transferred to States ²⁵	-94385	94986	601
Grants in Aid	3023	76537	79560

4.3 Revenue receipts are linked to economic activity and domestic product is its natural base. Overall revenue receipts unadjusted for transfers (grants in aid) were 24.49 per cent of GDP at market prices²⁶. These were distributed between the Union and States as 12.08 and 12.41 per cent respectively. (Revenue Receipts - GSDP ratio for the States based on the GSDP figures as indicated by their respective Directorates of Economics and Statistics would be 16.49 per cent.²⁷) Tax receipts were 16.47 per cent of GDP (10.26 per cent for the Union and 6.21 per cent for the States) and non-tax receipts an additional 5.77 per cent for these entities. Revenue receipts on per capita basis were Rs. 7892 (Rs. 7200 adjusted for grants in aid to the States.)

²⁵ The two amounts devolution of proceeds of taxes by the Union Government to States and States receipts of the same should be same. The difference between these two figures may be due to non-reconciliation.

²⁶ The adjusted revenue receipts of the Union and States would decline to Rs.7971 billion and would be 22.3 per cent of GDP.

²⁷ In case of all fiscal parameters, the ratio calculated based on national level GDP (market prices) would be higher compared to the ratio based on GSDP of the States.

**Table 4: Components of Revenue Receipts relative to GDP (Market Prices)
(percentage)**

	Union	States	Combined
Revenue Receipts	12.08	12.41	24.49
Tax Revenue	10.26	6.21	16.47
Non-Tax Revenue	4.38	1.39	5.77
Tax Proceeds transferred to States	-2.64	2.66	0.02
Grants in Aid	0.08	2.15	2.23

4.4 Both the Union and State Governments had deployed a variety of taxes to access revenue. These taxes were broadly of three types - income and expenditure taxes or direct taxes; taxes on property transactions and taxes on consumption of goods and services. Most of the revenue of the Union Government was generated by income and corporate taxes and customs and excise duties. In the case of States, sales tax, excise duties (mostly on alcohol), stamp duty and registration fees and taxes on motor vehicles were the major resource generators. The proportion of revenue generated by the Union and the States from a particular tax indicate the existence of a nearly dichotomized structure.

4.5 Revenue receipts from taxes were 10.26 per cent of GDP for the Union Government and bulk of that came from indirect taxes (5.63 per cent of GDP or 55 per cent of total tax receipts). In the case of States around 86 per cent of tax revenue came from taxes on commodities with sales tax alone contributing to around 61 per cent. Relative to GDP, receipts from State taxes were 6.21 per cent. For the Union and States combined, nearly two third of the receipts from taxes came from commodity and service taxes and only about one third from taxes on income and expenditures and property transactions. Taxes on property transactions contributed 5.39 per cent of total tax receipts. Though these were mostly levied by the States, yet their contribution was less than 13 per cent of the aggregate tax receipts of the States. The predominance of the commodity taxes was, therefore, across both the tiers of Government. There was hardly any overlap in receipts from taxes as the domain of the Union and the States was well defined. Even in case of excise duties, the commodities that attract taxes at the Union and the States level were different. Overall receipts from major taxes and their share relative to GDP are summarized in the table below:

Table 5: Receipts from Major Taxes and their Shares Relative to GDP

	Receipts (Rs. in crore)			Percent of GDP		
	Union	States	Combined	Union	States	Combined
Total Tax Revenue	366151	221486	587637	10.26	6.21	16.47

Others	353	2427	2780	0.01	0.06	0.07

4.6 There were, however, significant Inter-State variations in revenue and tax receipts. Tables in Annex 3 and 4 indicate Inter-State position in respect of various parameters relating to revenue and tax receipts. These Inter-State variations could be due to different base, different rates or differences in compliances or a combination of these. Some of the broad conclusions that emerge from these tables are summarized below:

a. While the ratio of overall tax receipts to GSDP²⁸ was 8.25 percent, for some of the Special Category States including Mizoram and Nagaland it was less than two per cent. The ratio varied from 3 to 6 per cent for Bihar, West Bengal, Jharkhand, Meghalaya, Sikkim and Tripura. It exceeded eight per cent for Andhra Pradesh, Chhattisgarh, NCT Delhi, Goa, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Rajasthan and Tamil Nadu.

b. Commodity taxes comprising of Sales Tax, Excise Duty, Goods and Passenger Taxes and Motor Vehicle Tax accounted for around 81 percent of the total tax receipts in respect of States. Sales Tax was the most prominent of the commodity

²⁸ The GSDP figures used in inter state comparisons are as released by the Directorates of Economics and Statistics. Since on aggregate basis, these figures are about 24.7 per cent lower than the GDP at market prices used in summary table, ratio of the receipts and other parameters relative to GSDP in state wise tables differ and are on high side. There are no comparable GSDP figures nor are these at market prices. However, since inter state comparisons uniformly uses the GSDP figures, comparability is maintained.

* Negligible

taxes. While the average ratio of sales tax receipts to GSDP was 5.05 per cent for all States put together, for Arunachal Pradesh, Manipur, Mizoram and Nagaland, it was less than 2 per cent. The ratio was in the range of 3 to 4 per cent for Himachal Pradesh, Meghalaya and Sikkim.

c. States were realizing less than 13 per cent of the total tax receipts from Property Taxes including Land Revenue and Stamp Duty and Registration Fees. The overall ratio of the Property Taxes to GSDP, varied from a low of 0.03 percent for Nagaland to 1.53 percent for Maharashtra. The other States which had the ratio in excess of 1.40 percent were Haryana, Punjab and Uttarakhand.

d. In commodity taxes, motor vehicle tax was one of the buoyant sources of taxes. While the average ratio of motor vehicle tax to GSDP was 0.45 percent, it exceeded 0.50 for Andhra Pradesh, Goa, Gujarat, Karnataka, Kerala, Madhya Pradesh, Orissa, Rajasthan and Tamil Nadu.

e. The average ratio of revenue receipts to GSDP for the States was 16.49 percent. For Haryana and Punjab, however, this ratio was close to 15 percent. In Non-special Category States, Bihar had the highest ratio of 26.05 percent followed by Orissa, Goa and Chhattisgarh. Special Category States usually had a much higher ratio of revenue receipts to GSDP. In case of Sikkim, due to larger accruals from lotteries, revenue receipts exceeded GSDP by a considerable margin.

f. In case of revenue receipts, GSDP is a poor normalizing factor because lower revenue receipts together with lower GSDP may give a higher ratio of revenue receipts to GSDP. When population is used as normalizing factor, the State-wise picture undergoes a complete change. As against average of Rs. 3999 per capita revenue receipts, these were just Rs. 1977 for Bihar. The other States where per capita revenue receipts were also less than Rs. 3000 included Jharkhand, Uttar Pradesh and West Bengal. The index of per capita revenue receipts at 49.44 was lowest for Bihar and at 818.53 highest for Sikkim. Index was less than 100 for Chhattisgarh, Jharkhand, Madhya Pradesh, Rajasthan, Uttar Pradesh and West Bengal.

g. Nearly 65 percent of the revenue receipts were generated by the States from their own resources which comprised their own taxes and non-tax receipts. However, in the case of Special Category States, particularly, Arunachal Pradesh, Manipur, Mizoram, Nagaland and Tripura own resources contributed less than 15 percent to their revenue receipts. In case of Sikkim, own resources contributed nearly 58 percent to its revenue receipts, but that was because of large inflow of receipts from lotteries, which were reckoned on gross basis.

h. Inter State position of various parameters of tax and revenue receipts with States arranged in ascending order of their per capita is indicated in graph below. This shows that the correlation of these with base level of prosperity may not be strong.

Graph-V
Percentage of Taxes to GSDP

4.7 Non tax receipts of the Union²⁹ and States could be considered as being composed of mainly two components: receipts from their sovereign functions like judiciary, police and income from their past investments which includes their receipts from financial intermediation and delivery of social and economic services³⁰.

Table 6 Non Tax Receipts of the Union and the States (Rs. in crore)

	Union	States	Combined
Fiscal Services	1689	1	1690
Financial Intermediation ³¹	56250	11223	67473
General Services	11676	11836	23512
Social Services	1643	4750	6393
Economic Services	84893	21883	106776
Total NTR	156151	49693	205844

4.8 Combined non-tax receipts for the Union and States was Rs.2058 billion and constituted nearly one fourth of the gross revenue receipts. As percent to GDP, non-tax receipts were 5.77 percent. The revenue from economic services accounted for around 51.87 percent of non-tax receipts, while an additional 32.78 percent came from financial intermediation and equity investment. Social services contributed 3.11 percent to the combined non-tax receipts. Bulk of the non-tax receipts of the Union Government from financial intermediation came as interest receipts from loans advanced to the States. General services, which included police, judiciary, public service commission and other, contributed a mere 11.42 percent to the total non-tax receipts. As was the case with tax receipts, inter state variations in non-tax

²⁹ Though non-tax revenue receipts of both the Union and States are reckoned on gross basis, in case of the Union, in economic services gross receipts from Railways and Telecommunication are also included which make these receipts substantially higher. In case of States, in only a few States Electricity distribution is departmental. These receipts are, therefore, not strictly comparable for these two tiers of Government.

³⁰ Receipts from Lotteries included as receipts from general services.

³¹ Dividend on equity investment and interest receipts on loans and advances are the two components of non tax receipts from fiscal intermediation. However, at both the tiers of Government, only a part of their incremental (also outstanding) borrowing was used for this intermediation and bulk of that was used for their own operations.

receipts were quite significant. Non-tax receipts were usually higher for States which had significant revenue from mineral royalties like Orissa, Madhya Pradesh and Assam or forest receipts³². In case of Andhra Pradesh, Bihar, NCT Delhi, Gujarat, Karnataka, Kerala, Madhya Pradesh, Rajasthan, Tamil Nadu, West Bengal, Uttar Pradesh, and Tripura non-tax receipts were less than 20 percent of their own resources.

5. Application of Resources-Revenue Expenditure

5.1 The Union and the States raise resources to perform their sovereign functions, maintain their existing network of delivery of social and economic services, extend the network of these services through capital expenditure and investments and discharge their debt servicing obligations. As indicated below over 85 per cent of the combined expenditure of the Union and States was in the nature of current or revenue expenditure, primarily to maintain the existing level of social and economic services network and for their sovereign functions.

5.2 Total gross revenue expenditure of the Union and States was Rs.9859 billion in 2005-06. The composition of revenue expenditure in terms of some of critical functions is indicated in table 7 below.

Table 7: Composition of Revenue Expenditure (Rs. in crore)

	Union	States	Combined
Organs of State	1892	4257	6149
Fiscal Services	3733	9668	13401
Financial Intermediation	141375	92824	234199
Administrative Services	17104	34361	51465
Miscellaneous General Services	4495	7755	12250
Pensions*	20255	40814	61069
Defence	51041	--	51041
Total General Services	239895	189679	429574
Social Services	38379	151534	189913
Economic Services	187026	93697	280723
Grants in aid	75337	10363	85700
Total	540637	445273	985910

5.3 It may also be possible to decompose revenue expenditure as expenditure on account of past commitments (expenditure on financial intermediation largely the interest payments and pensions would fall into this category), developmental activities (economic and social services expenditure may be treated as largely developmental) and residual (defence, administration and organization of State

³². Special category States which had a sizable chunk of revenue coming by way of grants also had a high proportion of non-tax receipts relative to their own sources. This was mainly because of their low own resource base including their own taxes and non-tax sources.

* Pension Expenditure does not include pension to Railways employees.

would be the residual). Grants in aid by a higher tier Government to the next lower tier are actually a transfer payment where the actual head/function wise expenditure may fall into the domain of the recipient. Excluding the grants component, composition of the revenue expenditure of the Union and the States indicated that about 33 percent of it was on account of past obligation (contractual in nature), nearly 52 percent on economic and social services and around 15 per cent on residual functions. Revenue receipts were able to meet about 89 per cent of revenue expenditure for both the Union and the States and the balance was met from borrowings or other capital receipts.

5.4 In the case of expenditure on past obligations and residual functions, expenditure in the nature of capital or loans and advances tends to be insignificant. Bulk of capital expenditure and loans and advances are for maintaining or extending the network of social and economic infrastructure. Combined expenditure of the Union and the States on social and economic services was Rs.5920 billion in 2005-06. It was around 16.6 per cent of GDP and Rs. 5348 on per capita basis. While the States contributed to around 80 per cent of combined expenditure on social services, their contribution in expenditure on economic services was around 45 percent. Expenditure on social services for both the Union and States had a strong revenue expenditure bias, which constituted over 91 per cent of total expenditure. In case of expenditure on economic services, revenue expenditure across the two tiers of Government differed significantly and in case of the States about one third of total expenditure was in the nature of capital expenditure.

Table 8: Developmental Expenditure (Rs. in crore)

	Union	States	Combined
Social Services			
Revenue Expenditure	38379	151534	189913
Capital Expenditure	781	14318	15099
Loans and Advances	1894	2856	4750
Revenue Expenditure on Social Services as per cent to Total Expenditure	93.48	89.82	90.54
Economic Services			
Revenue Expenditure	187026	93697	280723
Capital Expenditure	20305	61838	82143
Loans and Advances	4247	15101	19348
Revenue Expenditure on Economic Services as per cent to Total Expenditure	88.40	54.91	73.45
Total Developmental Expenditure	252632	339344	591976
Revenue Expenditure as per cent to Total Developmental Expenditure	89.22	72.27	79.50

5.5 Within the overall revenue expenditure, it may be important to look at the pension payments separately both in absolute numbers and also relative to revenue receipts of the Union and the States. Overall pension payments were 6.99 per cent of the revenue receipts of the Union and the States. (It was 4.70 per cent of revenue receipts for the Union Government and 9.2 percent of the revenue receipts for the States). There were, however, significant inter State variations in expenditure on

pensions. At 18.7 per cent of revenue receipts, Kerala was on top of the table. West Bengal, Bihar and Tamil Nadu (15.4, 13.8 and 13.1 per cent respectively) were the other States where pension payments took away over 13 per cent of the revenue receipts. Inter State comparative picture of pension payments giving the absolute figures and these payments relative to the revenue receipts is indicated in Annex 5.

5.6 There continued to be significant inter State variations in major parameters relating to expenditure. Some of these are indicated in Annex 6. Major conclusions of these variations are as under:

a. The ratio of revenue expenditure to total expenditure was largely range bound. Except for Delhi, Jharkhand, Madhya Pradesh and Manipur all the other States had their ratio of revenue expenditure to total expenditure in excess of 75 per cent. However, in the case of Kerala, Orissa, Punjab and West Bengal revenue expenditure accounted for more than 90 per cent of total expenditure.

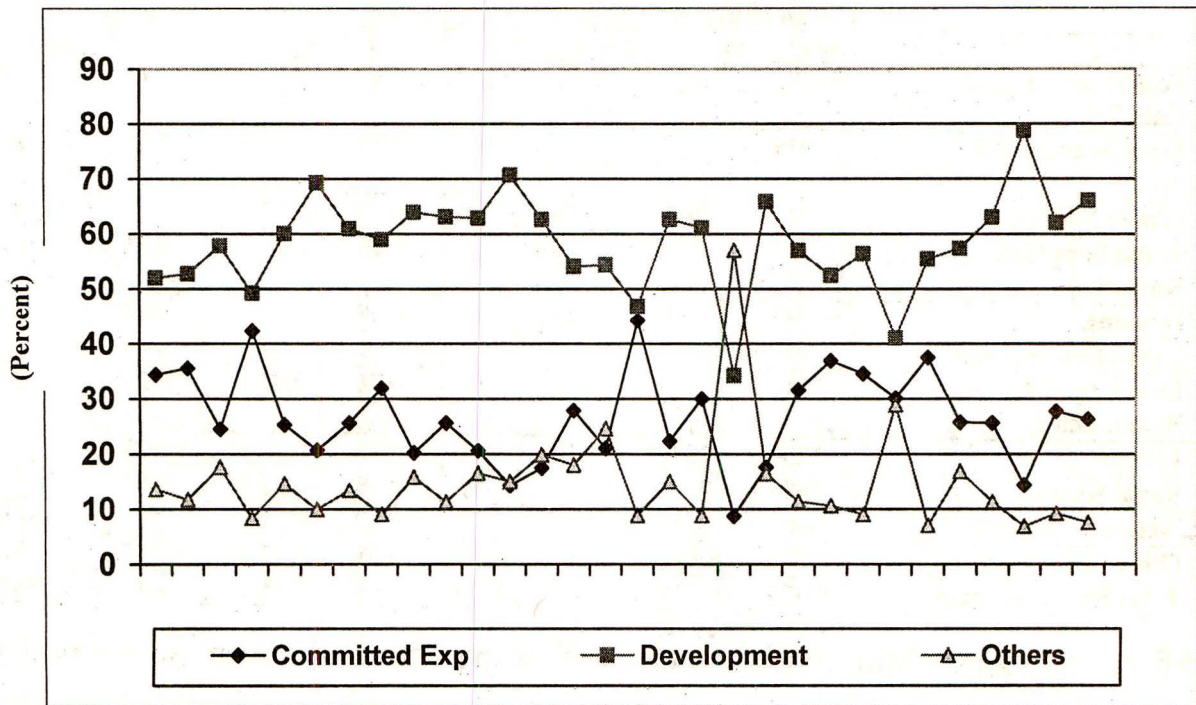

b. The committed component of revenue expenditure comprising of interest payments, and pension (which are in the nature of payments for the past liabilities) was around 31 percent of revenue expenditure net of grants in aid. However, in the case of Puducherry, Arunchal Pradesh, Meghalaya, Mizoram and Sikkim it was less than 20 percent. It exceeded 30 percent in case of Bihar, Gujarat, Kerala, Orissa, Punjab, Rajasthan, Uttar Pradesh, Tamil Nadu, West Bengal and Himachal Pradesh.

c. Development expenditure comprising expenditure on social and economic services accounted for around 56 percent of the total expenditure and for Orissa, Punjab, West Bengal and Sikkim where it was less than 50 percent, it was largely range-bound.

d. Inter state position in case of some of revenue expenditure with States arranged in an ascending order of their per capita income to indicate the spread in relation to the base level prosperity may be seen from the graph below.

Graph- VI

Committed, Development and Other expenditure to total Revenue Expenditure Ratio of States

5.7 It may be desirable to look at development expenditure on social and economic services at a further disaggregated level in terms of activities/functions. Education, Health and Family Welfare, Housing and Urban Development, Relief to mitigate the impact of Natural Calamities, Social Security, Information and Publicity and Labour and labour welfare have been the major constituents of expenditure on social services. As the responsibility of making the provision of social services vests largely with the States, the revenue expenditure incurred on social services by the States at Rs. 151534 crore constitutes 34 per cent of their total revenue expenditure while this percentage for the Union Government was only 7 per cent during 2005-06. Adding revenue expenditure incurred on economic services increases these percentages to 55 per per cent for States and to 42 per cent in case of Union indicating the predominant role assumed by the Union in creating the economic infrastructure in the country. Further, little more than 71 per cent of revenue expenditure on social services is incurred on education including art and culture; medical and public health including family welfare and water supply and drinking water by all States together during 2005-06. Union Government has also spent around 2/3rd of its total revenue expenditure on social sectors under these heads indicating that States are being assisted by the Union through various centrally sponsored schemes in these sectors. Education and health sectors are being accorded priority both by the Union and the State Government which is reflected by the fact that 64 per cent of total revenue expenditure on social sectors has been incurred on these two sectors by all States taking together while Union Government has spent 44 per cent of its revenue expenditure earmarked for social sectors towards education to assist the States to attain the goal of universalisation access to basic primary education covering all the unreached segments and social groups.

5.8 In expenditure on economic services, the share of Union Government was predominant. In communication, transport, food storage and warehousing, industry, energy and scientific research, expenditure by the States was even less. On the other hand, in irrigation and flood control, agriculture and allied activities and rural development, the States had a relatively bigger role.

Table - 10: Function Based Revenue Expenditure on Economic Services- Basic Parameters

	Revenue Expenditure (Rs. in crore)		Per Capita Expenditure		Expenditure as Percent to GDP		Expenditure as Percent to Revenue Expenditure

Others	3087	5978	28	54	0.09	0.17	0.57	1.34
Total Economic Services	187026	93697	1689	846	5.24	2.63	34.59	21.04

5.9 Most of stakeholders and seekers of information had desired information on recovery of user charges by the State on its economic and social infrastructure network. Recovery of user charges³³ for some important social and economic services for the Union and the States are indicated in table 11.

Table - 11: Recovery of User Charges from Select Social and Economic Services (Percent)

	Union	States	Combined
Education Art & Culture	0.42	2.61	2.23
Medical and Public Health	3.43	3.71	3.67
Family Welfare	1.32	1.81	1.54
Social Services	4.28	3.13	3.37
Economic Services	45.39	23.36	38.04

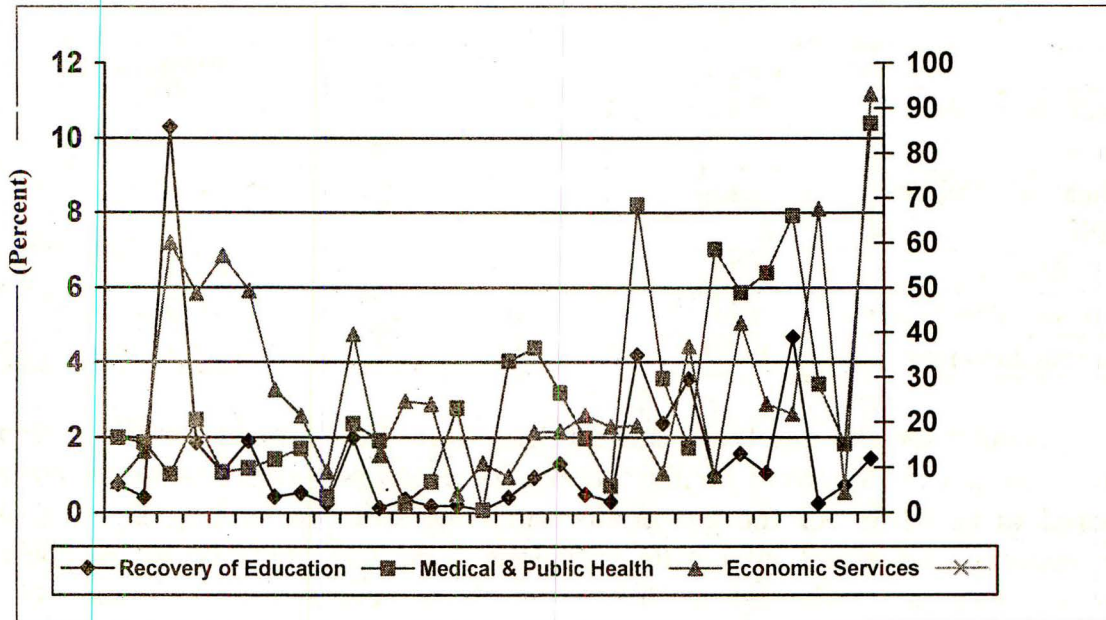

5.10 Overall user charges for social services were 4.28 percent for the Union Government and 3.13 percent for the States. For economic services also, recovery appeared to be better for the Union Government. Notwithstanding the overall poor recovery, significant inter state variations were also observed across these services, which are indicated in Annex 7. Broad conclusions are, however, summarized as under:

- a. Recovery of user charges, assessed as the ratio of revenue receipts to revenue expenditure continued to remain poor. In case of social services the average cost recovery was 3.13 percent. Goa, Haryana, Jharkhand, Punjab, Tamil Nadu, Uttar Pradesh and Himachal Pradesh were the only States which exceeded 3 percent.
- b. In respect of education, the average recovery was 2.61 per cent. The States which had the recovery rates higher than the States average were, Haryana, Jharkhand, Tamil Nadu, Uttar Pradesh and Himachal Pradesh.
- c. In case of medical and public health though the average recovery was 3.71 percent it exceeded 5 percent for Goa, Gujarat, Haryana, Maharashtra, Punjab and Tamil Nadu.
- d. In case of economic services, the average recovery was 23.36 percent. Higher recoveries were observed in case of Chhattisgarh, Goa, Gujarat, Jharkhand, Orrisa, Himachal Pradesh, Puducherry, Assam and Uttarakhand. These States either had a significant amount of revenue from royalty from minerals or revenue from forest. Recovery rates of economic services were less than 10 percent for Bihar, Delhi, Kerala, Punjab, West Bengal, Manipur and Tripura.

³³ Recovery of user charges has been defined as the ratio of revenue receipts from a specified service to revenue expenditure expressed as percentage. Both receipts and revenue expenditure are on gross basis as indicated in Finance Accounts.

e. A graphic presentation of user charges with the States arranged in ascending order of per capita income is indicated below which highlights that inter state variations are not driven by the base income levels.

Graph-VII
Percentage recovery of user charges showing inter State variation

5.11 This broad overview of accounts provides the basic details for the key stakeholders. For a detailed analysis one can refer to Finance Accounts of the Union or any specific State which are also in Public Domain.

Total Assets, Liabilities and Per Capita Assets, Ratio of Assets to Liabilities and Revenue Receipts

	Total Assets (Rs. in crore)	Total Liabilities (Rs. in crore)	Per Capita Assets (Rupees)	Per Capita Assets Index (per cent)	Ratio of Assets/Liabilities (per cent)	Ratio of assets to revenue receipts (Ratio)

Appendix A

Budgets, Accounts and National Income Accounts			
Description	Budget Systems	Accounting System	National Accounts
Coverage of the System	The coverage of the budget is coterminous with that of the Government. In practice, however, several transactions may be outside the budget	Generally follow the purview of the budget. In some cases, extra-budgetary accounts may also be available on a consolidated basis	Coverage is complete and includes all transactions, whether organized as a part of the budget or outside of all layers of Government and its parastatals.
Current and capital distinctions	Revenue and Capital budget is prepared	Broadly follow the budget systems	Require both accumulation accounts and balance sheets. These accounts are drawn from the regular accounts of a Government
Scope of capital account	In general, those items that have prospective benefits, a life span of more than one year, are above a specified monetary ceiling and usually financed by debt are included in the capital budget	Follow the budgetary practice.	Cover assets that are owned (and therefore can be disposed of) by Governments and those that have prospective economic benefits
Acquisition of existing assets flows during the year	Recorded at the purchase value of the asset. If they are acquired over a period of years, each year's budget shows only a part of the total outlay	Broadly follow the budgetary practice	Recorded in the system and where progress payments are made, the concept of constructive delivery is invoked
Stocks	Stocks of assets are not recorded in the budget or its associated documents	Stocks of assets are shown as cumulative capital expenditure and outstanding loans	Information on the accumulated levels is systematically included in perpetual inventory method
Assets built during the year	Outlays incurred during the year are shown. Total outlay on an asset is generally not shown.	Reflects the situation as in the budget	Fully recorded and imputations are made for work in progress
Financial assets Loans	Only the flows (and not the stocks) are shown in the budget	Accounts shown flows and outstanding balances	Compiled on a comprehensive basis for accumulation accounts balance sheets
Capital assets	Only amounts spent during the year on the acquisition or life renewal of these assets are shown in the budget	Data mostly restricted to flows.	
Depreciation	Not indicated	Not indicated	Imputed value based life of the assets is taken in arriving net capital
Inflation accounting	Not indicated	Not indicated	Appropriate deflators are used.
