(vi) Suspense Transactions:

The minor head 'Suspense' is not a final head of account. It accommodates interim transactions where further payments or adjustments of value are necessary before the transactions can be considered completed and finally accounted for. Accordingly, the transactions under the head, if not adjusted to the final head of account, are carried forward from year to year. The Suspense head has three subdivisions, viz. (1) Stock (2) Miscellaneous Works Advances & (3) Workshop Suspense.

The nature of Suspense transactions and their accounting are explained below:

- **1. Stock:** This head is debited with the value of material received for stock purposes and not any particular work. It is credited with the value of material issued to works or sold or transferred to other divisions. This head will, therefore, show debit balance representing the book value of material held in stock plus unadjusted charges connected with the manufacture of material, if any,
- **2. Miscellaneous Works Advance:** This head comprises debit for the value of stores on credit, expenditure incurred on deposit works in excess of deposit received, loss of cash or stores not written off, sum recoverable form Government servants, etc. The debit balances under this head, therefore, represent recoverable amounts.
- **3. Workshop Suspense:** The charges for jobs executed or other operations in departmental workshop are debited to this head pending their recovery or adjustment.

An analysis of the Suspense Transactions-Revenue portion of Irrigation Department for the year 2012-2013 is given in Appendix-III.

(xiii) Suspense Transections:

The minor head 'Suspense' is not a final head of account. It accommodates interim transactions where further payments or adjustments of value are necessary before the transactions can be considered completed and finally accounted for. Accordingly, the transactions under the head, if not adjusted to the final head of account, are carried forward from year to year. The Suspense head has three sub-divisions, viz. (1) Stock (2) Miscellaneous Works Advances and (3) Workshop Suspense.

The nature of Suspense transactions and their accounting are explained below:

- **1. Stock:** This head is debited with the value of material received for stock purposes and not any particular work. It is credited with the value of material issued to works or sold or transferred to other divisions. This head will, therefore, show debit balance representing the book value of material held in stock plus unadjusted charges connected with the manufacture of material, if any.
- **2. Miscellaneous Works Advance:** This head comprises debit for the value of stores on credit, expenditure incurred on deposit works in excess of deposit received, loss of cash or stores not written off, sum recoverable form Government servants, etc. The debit balances under this head, therefore, represent recoverable amounts.
- **3. Workshop Suspense:** The charges for jobs executed or other operations in departmental workshop are debited to this head pending their recovery or adjustment.

An analysis of the Suspense Transactions-Capital portion of Public Works Department for the year 2012-2013 is given in Appendix-V.
